

Professor S. ZEKI, FRS

COMPLETE LIST of PUBLICATIONS

1. Taste blindness to PTC in the Black Mountain Area of Carmarthenshire, Wales. *Man* **62**:38-39 (1962) (with L. Partridge & E. Sunderland).
2. Visual deficits related to the size of lesion in 'prestriate' cortex of optic chiasm sectioned monkeys. *Life Sci.* **6**:1627-1638 (1967).
3. The secondary visual areas of the monkey. *Brain Res.* **13**:197-226 (1969).
4. Representation of central visual fields in prestriate cortex of monkey. *Brain Res.* **14**:271-291 (1969).
5. Interhemispheric connections of prestriate cortex in monkey. *Brain Res.* **19**:63-75 (1970).
6. Cortical projections from two prestriate areas in the monkey. *Brain Res.* **34**:19-35 (1971).
7. Convergent input from the striate cortex (area 17) to the cortex of the superior temporal sulcus in the rhesus monkey. *Brain Res.* **28**:338-340 (1971).
8. Response properties and receptive fields of cells in an anatomically defined region of the superior temporal sulcus in the monkey. *Brain Res.* **35**:528-532 (1971) (with R. Dubner).
9. Response properties of cells in the fourth visual area in the monkey. *Anat. Rec.* **175**:477 (1973).
10. Colour coding in rhesus monkey prestriate cortex. *Brain Res.* **53**:422-427 (1973).
11. Comparison of the cortical degeneration in the visual regions of the temporal lobe of the monkey following section of the anterior commissure and the splenium. *J. Comp. Neurol.* **148**:167-176 (1973).
12. Functional organization of a visual area in the posterior bank of the superior temporal sulcus of the rhesus monkey. *J. Physiol.* **236**:549-573 (1974).
13. The mosaic organization of the visual cortex in the monkey. In *Essays on the Nervous System*, A Festschrift for J.Z. Young. R. Bellairs and E.G. Gray (Eds), Clarendon Press, Oxford, pp. 327-343 (1974).
14. Cells responding to changing image size and disparity in the cortex of the rhesus monkey. *J. Physiol.* **242**:827-841 (1974).
15. Neural mechanisms for signalling changes in image size and disparity in the cortex of the rhesus monkey. *Brain Res.* **85**:182 (1975).

16. The functional organization of projections from striate to prestriate visual cortex in the rhesus monkey. *Cold Spring Harbor Symp. Quant. Biol.* **40**, 591-600 (1975).
17. Colour coding in the superior temporal sulcus of the rhesus monkey. *J. Physiol.* **263**:169-170P (1976).
18. The projections to the superior temporal sulcus from areas 17 and 18 in the rhesus monkey. *Proc. Roy. Soc. B.* **193**:199-207 (1976).
19. Combined anatomical and electrophysiological studies on the boundary between the second and third visual areas of rhesus monkey cortex. *Proc. Roy. Soc. B.* **194**:555-562 (1976) (with D.R. Sandeman).
20. The analysis of motion and color in the posterior bank of the superior temporal sulcus. *Soc. Neurosci. Abs.* **2**, 1100P (1976).
21. Simultaneous anatomical demonstration of the representation of the vertical and horizontal meridians in areas V2 and V3 of rhesus monkey visual cortex. *Proc. Roy. Soc. B.* **195**:517-523 (1977).
22. Colour coding in the superior temporal sulcus of rhesus monkey visual cortex. *Proc. Roy. Soc. B.* **197**:195-223 (1977).
23. Combined functional and anatomical mapping of rhesus monkey visual cortex. *Proc. Int. Union. Physiol. Sci.* **12**, 710P (1977).
24. The third visual complex of rhesus monkey prestriate cortex. *J. Physiol.* **277**:245-272 (1978).
25. Uniformity and diversity of structure and function in rhesus monkey prestriate visual cortex. *J. Physiol.* **277**:273-290 (1978).
26. Functional specialisation in the visual cortex of the rhesus monkey. *Nature* **274**:423-428 (1978).
27. The topographic organization of rhesus monkey prestriate cortex. *J. Physiol.* **277**:193-226 (1978) (with D.C. Van Essen).
28. The cortical projections of foveal striate cortex in the rhesus monkey. *J. Physiol.* **277**:227-244 (1978).
29. Functional specialization and binocular interaction in the visual areas of rhesus monkey prestriate cortex. *Proc. Roy. Soc. B.* **204**:379-397 (1979).
30. Zu Brodmanns Area 18 und Area 19. *Exp. Brain Res.* **36**:195-197 (1979) (*in German*).
31. Effect of bilateral prestriate cortex (V4) lesions on wavelength discrimination in monkeys. *Pflügers Arch.* **382**, R. 46 (1979) (with W. Fries).
32. A function of the corpus callosum in the Siamese cat. *Proc. Roy. Soc. B.* **207**:249-258 (1980) (with W. Fries).
33. The response properties of cells in the middle temporal area (area MT) of owl monkey visual cortex. *Proc. Roy. Soc. B.* **207**:239-248.

34. The representation of colours in the cerebral cortex. *Nature* **284**, 412-418 (1980).
35. A direct projection from area V1 to V3A of rhesus monkey visual cortex. *Proc. Roy. Soc. B.* **207**:499-506 (1980).
36. The coding of intensity of illumination in the visual cortex of the monkey. *J. Physiol.* **303**, 65P (1980).
37. The consequences of varying background colours in stimulating cortical colour-coded cells. *J. Physiol.* **305**, 71-72P (1980).
38. The response of colour-specific cells in monkey visual cortex to colours produced by shadows. *J. Physiol.* **306**, 29-30P (1980).
39. The responses of cells in the anterior bank of the superior temporal sulcus in macaque monkeys. *J. Physiol.* **308**, 85P (1980).
40. The mapping of visual functions in the cerebral cortex. In *Brain Mechanisms of Sensation, Proc. 3rd Taniguchi Fdn Symp.*, R. Norgren and M. Sato (Eds), John Wiley & Sons, New York, pp. 105-128 (1980).
41. The representation of visual functions in the cerebral cortex. *Seitai No Kagaku* **31**, 459-465 (1980) (in Japanese).
42. A comparison of the distribution of wavelength selective cells at different eccentricities in three visual areas of the monkey cortex. *J. Physiol.* **330**, 57P (1982).
43. Do wavelength selective cells in monkey striate cortex respond to colours? *J. Physiol.* **330**, 57-58P (1982).
44. Do 'opponent colour' cells in monkey striate cortex respond to opponent colours? *J. Physiol.* **332**, 9-10P (1982).
45. Television recordings of the responses of wavelength-selective and colour-coded cells in monkey visual cortex. *J. Physiol.* **332**, 6P (1982).
46. The reaction of wavelength selective cells in monkey striate cortex to changes in wavelength composition. *J. Physiol.* **334**, 17-18P (1983).
47. Lightnesses, colours and the reaction of wavelength selective cells in monkey striate cortex. *J. Physiol.* **334**, 1P (1983).
48. Binocular cells of monkey striate cortex that receive conflicting information from the two eyes. *J. Physiol.* **336**, 26-27P (1983).
49. Do the variations in the concentration of wavelength-selective cells in the V4 complex of macaque monkey visual cortex depend on eccentricity? *J. Physiol.* **338**, 36P (1983).
50. The laminar origin of the cortical inputs to the fourth visual complex of macaque monkey cortex. *J. Physiol.* **340**, 51P (1983) (with W. Fries).

51. Does the colour of the after image depend upon wavelength composition? *J. Physiol.* **340**, 49p (1983).
52. Abnormal callosal connections of macaque monkey visual cortex. *J. Physiol.* **328**, 78P (1983).
53. A demonstration of 'void' colours and 'natural' colours. *J. Physiol.* **341**, 1P (1983).
54. The distribution of wavelength and orientation selective cells in different areas of monkey visual cortex. *Proc. Roy. Soc. B.* **217**:449-470 (1983).
55. The relationship between wavelength and color studied in single cells of monkey striate cortex. *Prog. Brain Res.* **58**:219-227 (1983).
56. Colour coding in the cerebral cortex: The reaction of cells in monkey visual cortex to wavelengths and colours. *Neurosci.* **9**:741-765 (1983).
57. Colour coding in the cerebral cortex: The responses of wavelength-selective and colour-coded cells in monkey visual cortex to changes in wavelength composition. *Neurosci.* **9**:767-781 (1983).
58. High cytochrome oxidase content of the V5 complex of macaque monkey visual cortex. *J. Physiol.* **348**, 23P (1984) (with L.S. Jen).
59. Colour vision. In *Frontiers in Physiological Research*, D.G. Garlick and P.I. Korner (Eds), Australian Academy of Science, Canberra, pp. 266-282 (1984).
60. The specialization of function and the function of specialization in the visual cortex. In *Recent Advances in Physiology*, P.F. Baker (Ed), Churchill-Livingstone, London, pp. 67-85 (1984).
61. Looking and Seeing. In *The Scientific Basis of Clinical Neurology*, C. Kennard and M. Swash (Eds), Churchill-Livingstone, London, pp. 172-187 (1984).
62. Specificity of connexions is related to cytochrome oxidase architecture in area V2 of macaque monkey visual cortex. *J. Physiol.* **353**, 23P (1984) (with S. Shipp).
63. The construction of colours by the cerebral cortex. *Proc. Roy. Inst. Gt. Britain* **56**:231-257 (1984).
64. Localization of function in the cerebral cortex - Past, present and future. *Brain* **107**:327-361 (1984) (with C.G. Phillips and H.B. Barlow).
65. Segregation of pathways leading from area V2 to areas V4 and V5 of macaque monkey visual cortex. *Nature* **315**:322-325 (1985) (with S. Shipp).
66. Colour pathways and hierarchies in the cerebral cortex. In *Central and Peripheral Mechanisms of Colour Vision*, D. Ottoson and S. Zeki (Eds), *Wenner-Gren Center International Symposium series Vol.43*, Macmillan, London, pp. 19-44 (1985).

67. Segregated output to area V5 from layer 4B of macaque monkey striate cortex. *J. Physiol.* **369**, 32P (1985) (with S. Shipp). 68. Rotatable three-dimensional computer reconstruction of the macaque monkey brain. *J. Physiol.* **371**, 25P (1985) (with J. Romaya).
68. Rotatable three-dimensional computer reconstruction of the macaque monkey brain. *J. Physiol.* **371**, 25P (1985) (with J. Romaya).
69. The anatomy and physiology of area V6 of macaque monkey visual cortex. *J. Physiol.* **381**, 62P (1986).
70. Anatomical demonstration of the repetitive representation of the vertical meridian in area V6 of macaque monkey visual cortex. *J. Physiol.* **390**, 30P (1987) (with S. Shipp).
71. Comment le cerveau construit les couleurs. *Science et Vie, Les Cinq Sens*, numero hors serie trimestriel, pp. 92-101 (1987) (*in French*).
72. Functional specialization in the visual cortex and its relation to visual agnosias. In *Physiological Aspects of Clinical Neuro-Ophthalmology*, C. Kennard and F. Clifford Rose (Eds), Chapman and Hall, London, pp. 101-121 (1988).
73. Anatomical guides to the functional organization of the visual cortex. In *Neurobiology of Neocortex*, P. Rakic and W. Singer (Eds), John Wiley, Chichester, pp. 241-251 (1988).
74. Sudden color-blindness of cerebral origin. *Soc. Neurosci. Abs.* **14**(2), 1251P. (1988) (with O. Sacks, R.L. Wasserman and R.M. Siegel).
75. The functional logic of cortical connections. *Nature* **335**:311-317 (1988) (with S. Shipp).
76. The organization of connections between areas V5 and V1 in macaque monkey visual cortex. *Eur. J. Neurosci.* **1**:309-332 (1989) (with S. Shipp).
77. The organization of connections between areas V5 and V2 in macaque monkey visual cortex. *Eur. J. Neurosci.* **1**:333-354 (1989) (with S. Shipp).
78. Modular connections between areas V2 and V4 of macaque monkey visual cortex. *Eur. J. Neurosci.* **1**:494-506 (1989) (with S. Shipp).
79. The colour centre in the cerebral cortex of man. *Nature* **340**, 386-389 (1989) (with C.J. Lueck, K.J. Friston, M.-P. Deiber, P. Cope, V.J. Cunningham, A.A. Lammertsma, C. Kennard and R. Frackowiak).
80. The colour centre in the prestriate cortex of man. *J. Physiol.* **417**, 90P (1989) (with P. Cope, V.J. Cunningham, M.P. Deiber, R.S.J. Frackowiak, K.J. Friston, C. Kennard, A.A. Lammertsma, and C.J. Lueck).

81. Functional segregation within area V2 of macaque monkey visual cortex. In *Seeing Contour and Colour*, Kulikowski, J.J., Dickinson, C.M. and Murray, I.J. (Eds), Pergamon Press, Oxford, pp. 120-124, (1989) (with S. Shipp).
82. Colour Vision and functional specialisation in the visual cortex. *Discussions in Neurosci.* **6**, 64pp. (1990).
83. The motion area (Area V5) of human visual cortex. *J. Physiol.* **423**, 101P (1990) (with V.J. Cunningham, M.P. Deiber, R.S.J. Frackowiak, K.J. Friston, C. Kennard, A.A. Lammertsma, C.J. Lueck & J. Romaya).
84. The physiology of area V6 in the awake, behaving monkey. *J. Physiol.* **423**, 100P (1990) (with P.P. Battaglini, P. Fattori & C. Galletti).
85. La construction des images par le cerveau. *La Recherche* **21**(222):712-721 (1990) (*in French*).
86. A theory of multi-stage integration in the visual cortex. In *The Principles of Design and Operation of the Brain*. J.C. Eccles and O. Creutzfeldt (Eds), Pontifical Acad. Sci., Vatican City, pp. 137-154 (1990).
87. A century of cerebral achromatopsia. *Brain* **113**:1721-1777 (1990).
88. Functional specialization in the visual cortex: The generation of separate constructs and their multistage integration. In *Signal and Sense: Local and Global Order in Perceptual Maps*. G.M. Edelman, W.E. Gall and W.M. Cowan (Eds), Wiley-Liss, New York, pp. 85-130 (1990).
89. The motion pathways of the visual cortex. In *Vision: Coding and Efficiency*, C. Blakemore (Ed), Cambridge Univ. Press, pp. 321-345 (1990).
90. A direct demonstration of functional specialization in human visual cortex. *J. Neurosci.* **11**:641-649 (1991) (with J.D.G. Watson, C.J. Lueck, K.J. Friston, C. Kennard & R.S.J. Frackowiak).
91. Cerebral akinetopsia (visual motion blindness). *Brain* **114**:811-824 (1991).
92. Parallelism and functional specialization in human visual cortex. *Cold Spring Harb. Symp. Quant. Biol.* **55**:651-661 (1991).
93. A thought experiment with positron emission tomography. In *Exploring brain functional anatomy with positron tomography*. *Ciba Symp.* **163**, Wiley, Chichester, pp. 145-164 (1991).
94. The visual image in mind and brain. *Sci. Amer.* **267**:69-76 (1992).
95. Area V5 of human visual cortex identified in individuals using PET and magnetic resonance imaging. *Soc. Neurosci. Abs.* **8**(2), 1394P. (1992) (with I.D.G. Watson, S. Shipp & R.S.J. Frackowiak).

96. A la Quête de l'Essentiel. *Connaissance des Arts*, 477, November 1991, 90-99. (A dialogue with the artist Balthus, *(in French)*).
97. Construction of the visual image by the cerebral cortex. In *Devl. Neurobiol. Vol. 1*, Fidia Research Foundation. Thieme, New York, pp. 109-115 (1992).
98. A tribute to Edwin Land. In "*Light and Life*" A Symposium in Honor of Edwin Land at The American Academy of Arts & Sciences, Cambridge, Massachusetts, 9 November 1991. *Amer. Acad. Arts & Sci. Bulletin XLV* 7:49-52 (April 1992).
100. The visual association cortex. *Curr. Opinion Neurobiol.* 3:155-159 (1993).
101. Area V5 of the human brain: Evidence from a combined study using positron emission tomography and magnetic resonance imaging. *Cerebral Cortex* 3:79-94 (1993) (with J.D.G. Watson, R. Myers, R.S.J. Frackowiak, J.V. Hajnal, R.P. Woods, J.C. Mazziotta & S. Shipp).
102. Going beyond the information given: the relation of illusory visual motion to brain activity. *Proc. Roy. Soc. Lond. B.* 252:215-222 (1993) (with J.D. Watson and R.S.J. Frackowiak).
103. The Mystery of Louis Verrey (1854-1916). *Gesnerus* 50:96-112 (1993).
104. Conscious visual perception without V1. *Brain* 116:1293-1302 (1993) (with J.L. Barbur, J.D.G. Watson, & R.S.J. Frackowiak).
105. The neurology of kinetic art. *Brain* 117:607-636 (1994) (with M.Lamb).
106. The timing of visual evoked potential activity in human area V4. *Proc. R. Soc. Lond. B.* 257:99-104 (1994) (with H. Buchner, U. Weyen, R.S.J. Frackowiak, & J. Romaya).
107. The cortical *Enigma*: a reply to Professor Gregory. *Proc. R. Soc. Lond. B.* 257:243-245 (1994).
108. A comparison of the latency of signals in human V1 and V5, using the technique of visual evoked response to motion (VERM). *J. Physiol.* 477.P (1994) (with D.H. ffytche, S. Walker & C. Guy).
109. Changes in occipital haemodynamics due to a visual stimulus detected by near infrared spectroscopy. *J. Physiol.* 479.P. (1994) (with J.H. Meek, C.E. Elwell, A.J. Khan, J. Romaya, J.S. Wyatt, & D.T. Delpy).
110. The brain activity related to residual motion vision in a patient with bilateral lesions of V5. *Brain* 117:1023-1038 (1994) (with S. Shipp, B.M. de Jong, J. Zihl, & R.S.J. Frackowiak).
111. The cerebral activity related to the visual perception of forward motion in depth. *Brain* 117:1039-1054 (1994) (with B.M. de Jong, S. Shipp, B. Skidmore, & R.S.J. Frackowiak).

112. The consequences of inactivating areas V1 and V5 on visual motion perception. *Brain* **118**:49-60 (1995), (with G. Beckers).
113. Phenomenal motion seen through artificial intra-ocular lenses. *Proc. R. Soc. Lond. B* **260**:165-166 (1995).
114. Motion-from-hue activates area A5 of human visual cortex. (1995) *Proc. R. Soc. Lond. B.* **260**:353-358 (1995) (with D.H. ffytche & B.D. Skidmore).
115. The parallel visual motion inputs into areas V1 and V5 of human cerebral cortex *Brain* **118**, 1375-1394 (1995) (with D.H. ffytche & C.N. Guy).
116. Functional demarcation of a border between areas V6 and V6A in the superior parietal gyrus of the macaque monkey. *Eur. J. Neurosci.* **8**:30-52 (1995) (with C. Galletti, P. Fattori, P.P. Battaglini, & S. Shipp).
118. Retinotopic maps in human prestriate visual cortex: The demarcation of areas V2 and V3. *NeuroImage* **2**:125-132 (1995) (with S. Shipp, J.D.G. Watson, & R.S.J. Frackowiak).
119. Regional changes in cerebral haemodynamics as a result of a visual stimulus measured by near infrared spectroscopy. *Proc. R. Soc. Lond. B.* **261**, 351-356 (1995) (with J.H. Meek, C. E. Elweel, M.J. Khan, J. Romaya, J.S. Wyatt, & D.T. Delpy).
120. The motion vision of the blind. *NeuroImage* **2**:231-235 (1995).
121. Segregation and convergence of specialised pathways in macaque monkey visual cortex. *J. Anat.* **187**:547-562 (1995) (with S. Shipp).
122. Brain activity related to the perception of illusory contours. *NeuroImage* **3**:104-108 (1996) (with D. H. ffytche).
123. A direct demonstration of functional specialization within motion-related visual and auditory cortex of the human brain. *Current Biology* **6**:1015-1019 (1996), with R.J. Howard, M. Brammer, I. Wright, P.W. Woodruff, & E.T. Bullmore).
124. Are areas TEO and PIT of monkey visual cortex wholly distinct from the fourth visual complex (V4 complex)? *Proc. R. Soc. Lond. B* **263**:1539-1544 (1997).
125. Motion specific responses from a blind hemifield. *Brain* **119**:1971-1982 (1996) (with D.H. ffytche, & C.N. Guy).
126. The activity in human areas V1/V2, V3 and V5 during the perception of coherent and incoherent motion. *NeuroImage* **5**:1-12 (1997) (with D.J. McKeefry, J.D.G. Watson, R.S.J. Frackowiak, & K. Fong).
127. A direct demonstration of perceptual asynchrony in vision. *Proc. R. Soc. Lond. B.* **265**:393-399 (1997) (with K. Moutoussis)
128. The Woodhull Lecture: visual art and the visual brain *Proc. Roy. Inst. GB* **68**:29-63 (1997).

129. Mapping and topographic organization of the visual field in human area V4 as revealed by fMRI. *NeuroImage* **5**(4), Pt. 2, S1 (1997) (with D. McKeefry).
130. Functional segregation and temporal hierarchy of the visual perceptive systems. *Proc. R. Soc. Lond. B* **264**:1407-1414 (1997) (with K. Moutoussis).
131. Temporal hierarchy of the visual perceptive systems in the Mondrian world. *Proc. R. Soc. Lond. B* **264**:1415-1419 (1997) (with K. Moutoussis).
132. Dynamism of a PET image: Studies of visual function. In *Human Brain Function*, RSJ Frackowiak, KJ Friston, CD Frith, JC Mazziotta, R Dolan (Eds), Academic Press, pp 163-181 (1997).
133. The position and topography of the human colour centre as revealed by functional magnetic resonance imaging. *Brain* **120**:2229-2242 (1997) (with D.J. McKeefry).
134. The color and motion systems as guides to conscious visual perception. In *Cerebral Cortex*, Rockland et al. (Eds) Plenum Press, New York *Vol.12*: , Chapter 17, 777-809 (1997).
135. The motion vision of the blind and the modularity of consciousness. *Trans. Med. Soc. London.* **112**:11-18 (1997).
136. The Riddoch syndrome: insights into the neurobiology of conscious vision. *Brain* **121**:25-45 (1998) (with D.H. ffytche).
137. Art and the Brain. *Daedalus* **127**(2):71-103 (1998).
138. The asynchrony of consciousness. *Proc. R. Soc. Lond. B* **265**:1583-1585 (1998) (with A. Bartels).
139. Three cortical stages of colour processing in the human brain. *Brain* **121**:1669-1685 (1998) (with L. Marini).
140. The cortical site for the generation of forms from motion. *NeuroImage* **7**: S329 (1998) (with A.C. Bork).
141. How does the brain see a blue banana? *Eur. J. Neurosci.* **10**:13204 (1998), (with L.Marini).
142. Separate analysis of motion information derived from a complex visual scene. An fMRI investigation. *NeuroImage* **7**: S330 (1998) (with P. Mazoyer).
143. A visuo-somatomotor pathway through superior parietal cortex in the macaque monkey: cortical connections of areas V6 and V6a. *Eur. J. Neurosci.* **10**:3171-3193 (1998) (with S. Shipp & M. Blanton).
144. Functionally intersected maps in macaque pulvinar. *Eur. J. Neurosci.* **10**:9318 (1998) (with S. Shipp).
145. The autonomy of the visual systems and the modularity of conscious vision. *Phil. Trans. R. Soc. Lond. B* **353**:1911-1914 (1998) (with A. Bartels).

146. The theory of multistage integration in the visual brain. *Proc. Trans. R. Soc. Lond. B* **265**:2327-2332 (1998) (with A. Bartels).
147. Human brain activity during spontaneously reversing perception of ambiguous figures. *Proc. R. Soc. Lond. B* **265**:2427-2433 (1998) (with A. Kleinschmidt, C. Büchel & R.S.J. Frackowiak).
148. Parallel processing, asynchronous perception, and a distributed system of consciousness in vision. *The Neuroscientist*, **4**:365-372 (1998).
149. Art and the brain. *Journal of Consciousness Studies*, **6**:76-96 (1999).
150. The clinical and functional measurement of cortical (in) activity in the visual brain with special reference to the two subdivisions (V4 and V4 $\alpha$ ) of the human colour centre. *Phil. Trans. R. Soc. Lond. B* **354**:1371-1382 (1999) (with A. Bartels).
151. Toward a theory of visual consciousness. *Consciousness and Cognition* **8**:225-259 (1999) (with A. Bartels).
152. Splendours and Miseries of the Brain. *Proc. Trans. R. Soc. Lond. B* **354**:253-265 (1999)
153. The neurological basis of conscious color perception in a blind patient. *Proc. Nat. Acad. Sci. USA* **96**:14124-14129 (1999) (with S. Aglioti, D McKeefry & G. Berlucchi).
154. The architecture of the colour centre in the human visual brain. *Eur. J. Neurosci.*, **12**:172-193 (2000) (with A. Bartels).
155. A psychophysical dissection of the brain sites involved in color-generating interactions. *Proc. Nat. Acad. Sci. USA* **97**:8069-8074 (2000) (with K. Moutoussis).
156. Human area V5 and motion in the ipsilateral field. *Eur. J. Neurosci.*, **12**:3015-3025 (2000) (with D. ffytche).
157. The neurology of saccades and covert shifts in spatial attention: an event-related fMRI study *Brain* **123**(11):2273-2288 (2000) (with R. Perry).
158. The neural basis of romantic love. *NeuroReport* **11**(17):3829-3834 (2000) (with A Bartels).
159. l'artiste a sa maniere est un neurologue. *La Recherche* **4**:98-100 (2000). In French
160. Abstraction and Idealism: from Plato to Einstein: how do we acquire knowledge? *Nature* **404**(6778):547 (2000).
161. La vision des couleurs selon Edwin Land. *Dossier pour la Science* 101-102 April (2000). In French
162. Les images visuelles. *Dossier pour la Science* 102-110 April (2000). In French
163. Closet reductionists. *Trends Cogn. Sci.* **5**(2):45-46 (2001).

164. Localization and globalization in conscious vision. *Annu. Re. Neurosci.* **24**:57-86 (2001).
165. Essays on Science and Society: Artistic Creativity and the Brain. *Science* **293**(5527):51-52. (2001).
166. Functional organization of macaque V3 for stereoscopic depth. *J. Neurophysiol.* **86**(3):2195:2203 (2001) (with D.Adams).
167. The responses of spectrally selective cells in macaque area V2 to wavelengths and colors. *J. Neurophysiol.* **87**(4):2104-2112 (2002) (with K. Moutoussis).
168. Neural concept formation and art: Dante, Michelangelo, Wagner. *J. Conscious. Studies* **9**(3):53-76 (2002).
169. The relationship between cortical activation and perception investigated with invisible stimuli. *Proc. Natl. Acad. Sci, USA* **99**(14):9527-9532 (2002) (with K. Moutoussis).
170. The functional organization of area V2. I: Specialisation across stripes and layers. *Vis. Neurosci.* **19**:187-210 (2002) (with S. Shipp).
171. The functional organization of area V2. II: The impact of stripes on visual topography. *Vis. Neurosci.* **19**:211-231 (2002) (with S. Shipp).
172. Improbable areas in the visual brain. *Trends in Neurosci.* **26**: 23-26 (2003).
173. The processing of kinetic contours in the brain. *Cereb. Cortex.* **13**: 193-203 (2003) (with R.J. Perry and A. Bartels)
174. The disunity of consciousness. *Trends in Cogn. Neurosci.* **7**:214-218 (2003)
175. The integration of color and motion by the human visual brain, Soc. Neurosci. Abstracts, Program No. 819.2 (2003) (with M Self)
176. Dante, Michelangelo und Wagner – Das Gehirn als Konstrukteur genialer Kunstwerke, in Maar C and Burda H (eds.) *Iconic Turn – die neue Macht der Bilder* (2004); DuMont Literatur und Kunst Verlag, Köln
177. Improbable areas in color vision, in Chalupa L and Werner J (eds.), *The Visual Neurosciences, Vol 2*: 1029-1039 (2004); MIT Press
178. Functional Specialization in the Visual Brain - Probable and Improbable Visual Areas, in Frackowiak RSJ, Friston KJ, Frith CD, Dolan RJ, Price CJ, Zeki S, Ashburner J, Penny W (eds.) *Human Brain Function* (2nd edition, 2004); Elsevier, San Diego.
179. Insights into Visual Consciousness, in Frackowiak RSJ, Friston KJ, Frith CD, Dolan RJ, Price CJ, Zeki S, Ashburner J, Penny W (eds.) *Human Brain Function* (2nd edition, 2004); Elsevier, San Diego.
180. Processing Systems as Perceptual Systems, in Frackowiak RSJ, Friston KJ, Frith CD, Dolan RJ, Price CJ, Zeki S, Ashburner J, Penny W (eds.) *Human Brain Function* (2nd edition, 2004); Elsevier, San Diego. (with K. Moutoussis)

181. The Asynchrony of Visual Perception, in Frackowiak RSJ, Friston KJ, Frith CD, Dolan RJ, Price CJ, Zeki S, Ashburner J, Penny W (eds.) *Human Brain Function* (2nd edition, 2004); Elsevier, San Diego. (with K. Moutoussis)
182. The Chronoarchitecture of the Human Brain: Functional Anatomy Based on Natural Brain Dynamics and the Principle of Functional Independence, in Frackowiak RSJ, Friston KJ, Frith CD, Dolan RJ, Price CJ, Zeki S, Ashburner J, Penny W (eds.) *Human Brain Function* (2nd edition, 2004); Elsevier, San Diego. (with A. Bartels)
183. Functional brain mapping during free viewing of natural scenes. *Hum Brain Mapp.* **21**:75-85 (2004) (with A Bartels)
184. The Neurology of Ambiguity, *Conscious Cogn.* **13**:173-96 (2004)
185. The neural correlates of maternal and romantic love. *NeuroImage.* **21**:1155-66 (2004) (with A Bartels)
186. Thirty years of a very special visual area, Area V5. *J Physiol.* **15**;557(Pt 1):1-2. (2004)
187. Neural correlates of beauty. *J Neurophysiol.* **91**:1699-705 (2004) (with H Kawabata)
188. The chronoarchitecture of the human brain - natural viewing conditions reveal a time-based anatomy of the brain. *NeuroImage.* **22**:419-33 (2004) (with A Bartels)
189. Law and the brain: Introduction. *Phil Trans R Soc Lond B Biol Sci.* **359**:1661-5 (2004) (with O Goodenough)
190. Brain dynamics during natural viewing conditions - a new guide for mapping connectivity in vivo. *NeuroImage.* **24**:339-49 (2005) (with A Bartels)
191. Introduction: cerebral cartography 1905-2005. *Phil Trans R Soc Lond B Biol Sci.* **360**: 651-2 (2005)
192. The chronoarchitecture of the cerebral cortex. *Phil Trans R Soc Lond B Biol Sci.* **360**:733-50 (2005) (with A Bartels)
193. Measuring sight by sound. *Brain* **128**:1226 - 1229 (2005) Book review, of *Brain and Visual Perception: the Story of a 25-year Collaboration* by David Hubel and Torsten Wiesel
194. The Ferrier Lecture 1995. Behind the Seen: the Functional Specialization of the Brain in Space and Time. *Phil Trans R Soc Lond B Biol Sci.* **360**:1145-83 (2005)
195. The integration of colour and motion by the human visual brain. *Cereb Cortex.* **15**:1270-9. (2005) (Epub 2004 Dec 22) (with M Self)
196. Les fonts neuronals de l'ambigüitat de Salvador Dalí (Neural Sources of Salvador Dalí's Ambiguity) (In Catalan). In *Noves Fronteres de la Ciència, l'Art i el Pensament*, edited by the Center KRTU-Department of Culture of the Generalitat de Catalunya with the co-operation of the Art and Contemporary Culture Lectureship of the Universitat de Girona and ArtNodes (2005)

197. The temporal order of binding visual attributes. *Vision Research* 46(14):2280-6. (2006) (with A Bartels)
198. The Theory of Microconsciousness. Book chapter, in *Blackwell Companion to Consciousness* (2007)
199. The effect of background colors on the tuning of color sensitive cells in monkey area V4. *Journal of Neurophysiology* 95(5):3047-59 (2006) (with M Kusunoki and K Moutoussis)
200. Seeing invisible motion: a human fMRI study. *Current Biology* 16:574-9 (2006) (with K Moutoussis)
201. Perceptual compression of space through position integration. *Proc. Roy. Soc. B.* 273(1600):2507-12. (2006) (with B Roulston and M Self)
202. Sightless view: neural correlates of occluded objects. *Cerebral Cortex* 17(5):1197-205 (2007) (with O Hulme)
203. Natural vision reveals regional specialisation to local motion and to contrast-invariant, global flow in the human brain. *Cerebral Cortex* (2007, Epub ahead of print) (With A Bartels and N Logothetis)
204. Zeki S, Hulme OJ, Roulston B, Atiyah M (2008) The Encoding of Temporally Irregular and Regular Visual Patterns in the Human Brain. *PLoS ONE* 3(5): e2180. doi:10.1371/journal.pone.0002180

### **Books**

***A Vision of the Brain.*** Blackwell Scientific Publications, Oxford. 384 pp.  
(1993) (Translated into Japanese and Spanish - currently out of print)

***La Quête de l'essentiel. (in French)*** Les Belles Lettres, Archimbaud, Paris  
(1995) (with Balthus, Count Klossowski de Rola) (out of print)

***Inner Vision: an exploration of art and the brain.*** Oxford University  
Press, (October 1999). (Translated into Japanese, Chinese,  
Korean, Greek, Italian and Spanish)

***Splendours and Miseries of the Brain.*** Blackwell, Oxford. (2009)
